Jayne - No attachment to this e-mail but there was an attached map in the prior e-mail that went to Jenny, Alan and I. Since you work with Jenny and she has the overall lead on the OR TMDL that might be the best way to get info quickly...hopefully my e-mail and yours to David Waltz asking for you to be included will prompt direct receipt in the future.

Hi David,

Was there an attachment included in these emails? If so, please resend.

Thanks.

Jayne

Ryan, All-

There are excellent tools and should really hit the mark that was discussed during the Kick-off meeting: Glen Spain (PFCCA) made a very clear, concise recommendation to identify the questions DEQ wants the TWGs to consider.

I am focused on the bacteria and will provide feedback to Kevin to discuss tomorrow as part of the prep for LSAC #2.

Thanks,
 David

Here's the one for sediment.

 Subject: Mid-Coast Process maps

Attached are the draft process maps for the Mid-Coast TMDL that Kevin and I produced. The purpose is to help LSAC/TWG members understand the flow of the process and the objectives for each step where they might have input.

Each map is at a slightly different stage of refinement but we want them to all be in the exact same format eventually. The sediment one in particular still needs the objectives to be included. I haven't had time to update it yet. I should be able to get to that today and will send a revision later on.

I apologize for getting these out a day behind when we said we would. My fault.

Comments are appreciated.

Thanks,

Ryan
